

Acting Chief, FBID

17 April 1961

Chief, Field Operations Staff, FBID

Letter of Information Notes - March 1961

1. Preparations continued to send a 2-man survey team to Puerto Rico on 1 May of this year to determine whether the island would be a suitable location for monitoring South American, African, and European transmitters. Arrangements providing for Department of Defense support of this mission are presently being made.

2. The Panama Post survey of reception potential completed at the end of March clearly indicates that considerable expansion of the Post should be accomplished as soon as possible to permit FBIS to maintain minimum necessary coverage of Latin American countries.

3. A logograph book, collating all logograph information sent to field bureaus as the individual categories were revised and compiled, is in preparation. Publication is expected before the end of next month.

4. The Broadcast Information Section recently instituted the practice of including background and schedule details of foreign press services in its weekly Station and Program Notes in order to give clients more rapid service on various foreign press transmissions, new agencies, etc. The irregularly published "Press Notes and Alterations" will continue to be released as time permits.

2

5. Radio Bucharest replaced its French and English programs for the Near and Middle East with Arabic language programs on 3 April totalling 7 hours weekly. This is the first time Bucharest has broadcast in this language.

6. Bureaus are reminded that programs starting at midnight GMT should be slugged 0000 GMT not 0001 GMT. The ending time for programs closing at midnight GMT should be expressed as 2400 GMT.

1 Preparations continued to send a 2-man survey team to Puerto Rico on 1 May of this year to determine whether the island would be a suitable location for monitoring South American, African, and European transmitters. Arrangements providing for Department of Defense support of this mission are presently being made.

2. The Panama Post survey of reception potential completed at the end of March clearly indicates that considerable expansion of the Post should be accomplished as soon as possible to permit FBIS to maintain minimum ^{NECESSARY} ~~adequate~~ coverage of Latin American countries.

3. A logograph book, ^{collating} ~~collating~~ all logograph information sent to field bureaus as the individual categories were ^{revised and} ~~compiled~~, is in preparation. Publication is expected before end of next month.

4. The 100- kilowatt ~~station~~ of the "Cuban Experimental Shortwave" at Havana, which has been testing in Spanish for the past few weeks, started an experimental English service for North America between 0300 and 0400 GMT on 11770 kilocycles on 12 April. It is believed that the formal inauguration of the Cuban International Service will take place on May Day.

4. The Broadcast Information Section prepared an informal, unclassified working paper on the Cuban radio and television system with comment on networks, programming etc. The report was expanded to include classified material to be published as an OO/F for the intelligence community.

6. The Broadcast Information Section recently instituted the practice of including background and schedule details of ^{own} ~~foreign~~ press services in its weekly Station and Program Notes in order to give clients more rapid service on various foreign press transmissions, new agencies, etc. The irregularly

published "Press Notes and Alterations" will continue to be released as time permits.

7. Radio Bucharest replaced its French and English programs for the Near and Middle East with Arabic language programs on 3 April totalling 7 hours weekly. This is the first time Bucharest has broadcast in this language.

8. Bureaus are reminded that programs starting at midnight GMT should be slugged 0000 GMT not 0001 GMT. The ending time for programs closing at midnight GMT should be expressed as 2400 GMT.

BIS ITEMS FOR LETTER OF INFORMATION 15 APRIL 1961:

1. The 100 kilowatt station of the "Cuban Experimental Shortwave" at Havana, which has been testing in Spanish for the past few weeks, started an experimental English service for North America between 0300 and 0400 GMT on 11770 kilocycles on 12 April. It is believed that the formal inauguration of the Cuban International Service will take place on May Day.
2. The Broadcast Information Section prepared an informal, unclassified working paper on the Cuban radio and television system with comment on networks, programming, etc. The report was expanded to include classified material to be published as an for the intelligence community.
3. The Broadcast Information Section recently instituted the practice of including background and schedule details of foreign press services in its weekly Station and Program Notes in order to give clients more rapid service on various foreign press ~~developments~~ transmissions, new agencies, etc. The irregularly published "Press Notes and Alterations" will continue to be released as time permits.
4. Radio Bucharest replaced its French and English programs for the Near and Middle East with Arabic language programs on 3 April totalling 7 hours weekly. This is the first time Bucharest has broadcast in this language.
